

# Dye Sublimation Inkjet Printers

## Epson B40w Printer - A4

The B40w is ideally suited for entry level customers. The printer features 4-colour high resolution printing up to 5760 x 1400dpi to a maximum print size of A4. The interface options to your computer are USB 2.0 / Wireless LAN 802.11b/g or wired Ethernet LAN (100BASE-TX, 10BASE-T).

Dimensions: 16.1cm (h) x 43.5cm (w) x 24cm (d)  
Weight: 4kg

**Product Code: H001**  
**Price: £115.00**

## Epson R1400 Printer - A3

The R1400, is a flexible 6 colour A3+ printer that provides high quality images at speed. It is ideal for sublimation printing and has consistently been our best selling printer. The interface to your computer is USB 2.0.

Dimensions: 41.3cm (h) x 61.5cm (w) x 31.4cm (d)  
Weight: 11.5kg

**Product Code: H007**  
**Price: £295.00**

## Epson Stylus Pro 4450 Printer - A2

The Epson 4450 printer is ideal for schools requiring the larger A2 print capability or roll feed and is very popular with textile departments and City Learning Centres, for full panel printing. The interface to your computer is USB 2.0 or wired Ethernet (100BASE-TX, 10BASE-T).

Dimensions: 35.4cm (h) x 84.8cm (w) x 76.5cm (d)  
Weight: 39.4kg

**Product Code: H004**  
**Price: £1995.00**

# Dye Sublimation Gel Printers

A new age has arrived in sublimation printing!

## 'SubliJet R' Sublimation Gel Printers

The latest innovation in Dye Sublimation is the new Ricoh Gel Printers that use the new 'SubliJet R' higher-viscosity gel ink formulation.

This makes the Ricoh printer ideal for installations where the printer may sit unused for longer periods of time, for example between coursework projects.

The printer uses environmentally-friendly, water-based inks, and the four-colour ink configuration (cyan, magenta, yellow, and black) is available in convenient, easy to change cartridges.

The Ricoh printers utilise the latest print head technology. This makes them one of the fastest printers on the market, with output speeds that are equivalent to that of most laser printers.

Colour matching is made simple with the new PowerDriver™ advanced colour management software. This features pre-set colour management output options for the most commonly used substrates, such as ceramic, apparel, metal, etc to allow SubliJet R ink users to easily achieve accurate, brilliant colour output, print after print.

### Ricoh GX e3300n Printer - A4

This new entry level sublimation gel printer is ideal for short run, high quality images at speed. The maximum print size is A4 and the interface to your computer is USB 2.0.

Dimensions: 26.3cm (h) x 50cm (w) x 49.1cm (d)  
Weight: 15.5kg

**Product Code: H010**

**Price: £165.00**

(this is an introductory price)

### Ricoh GX7000 Printer - A3

This A3 sublimation gel printer is ideal for even the most demanding school or CLC. Blisteringly fast printing speeds, with a first out print time of 9 seconds, you will never be waiting around for this printer. The interface to your computer is USB 2.0.

Dimensions: 26.5cm (h) x 54.5cm (w) x 55.8cm (d)  
Weight: 19.1kg

**Product Code: H008**

**Price: £510.00**

Don't forget to order free...

### PowerDriver Software

PowerDriver™ is the most advanced colour management software available for the SubliJet R digital transfer systems. PowerDriver delivers enhanced functionality and a higher level of colour output. Compatible with GX e3300n & GX7000 printer models.

**Product Code: SW011**

# Chromablast Inkjet Printers

These printers are designed to be used in conjunction with our specially formulated Chromablast ink and Chromablast media for cotton decoration.

The printed image is heat pressed onto your cotton based textile or garment to leave you with a vibrant colourful image that looks outstanding and feels incredibly soft... it's like nothing else on the market.

The key to the ChromaBlast Digital Colour Imaging System is the chemical bonding between the ink and the coating on the media. Where the ink chemistry and the media coating chemistry touch, there is a cross-link reaction under heat and pressure that chemically bonds the image to the cotton.

Having chosen your printer you will need to choose your Chromablast Bulk Ink Feeding system and some Chromablast media to print onto.

If you would like to receive a sample of a textile printed with Chromablast please contact us on 0121 288 9898.
